

Insulated Rolling Shutter Doors

Insulated Rolling Shutter Doors have been developed to provide a product suitable for the stringent demands of industry today. An ideal choice for many commercial and industrial applications where in addition to security, thermal or acoustic insulation is required. Using modern state of the art production techniques and the best quality material, the Avon Insulated Rolling Shutter will provide a robust and durable product which is also safe and reliable.

Constructed from pre galvanised material, designed to give a hollow section panel which can be filled with CFC free thermal insulation material 0.69W/m² U value,

the design also provides greater strength in terms of wind loading capabilities, Class 5 up to 8.0mtrs wide. As standard all Avon's Insulated rolling shutters come complete with full perimeter seals, vertical edge brush seals, a soffit seal and a neoprene seal to the bottom of the door curtain. Operation is by electric motor, with integral travel limit switches, an emergency manual override plus an anti fall back device all in compliance with current Health & Safety regulations, EN13241-1, 89/106/EC, 89/336/EEC, 93/68/EEC, 89/392/EEC and are CE plated. Where frequent use is anticipated the electric operator can be linked to a variety of automatic control options.

Each Avon door is tailored to fit to a specific opening, we offer a full installation service which uses direct labour only CSCS accredited "Door Systems Engineers" and every door installed comes with a full 12 month warranty on workmanship & components. As well we operated as comprehensive after sales service for repairs and maintenance.
