

Security Rolling Shutter Doors

With security being an ever-increasing concern for business and home owners alike, the range of Rolling Security Shutters from Avon Industrial Doors Ltd offers an economic yet attractive solution to the threat of intruders.

Applications

Rolling Shutters are suitable for a variety of applications, including retail premises, commercial buildings and hospitals. Doors can be arranged to be fitted internally or externally depending on the building construction and local authority planning constraints.

Construction

Manufactured from either high quality extruded aluminium or galvanised steel for longer life, they are fully compliant with current regulations to BS EN1324 (Product Standard) and CE marked in accordance with the Construction Products Directive & Machinery Directive where applicable.

Appearance

The finish of these Security doors can be chosen from the standard galvanised, Plastisol coated steel or a Polyester Powder coated paint in one of many RAL colours. The doors can be tailored to cater for most individual requirements with a solid, perforated or punched sections depending on whether vision, light or ventilation is required through the door....

Operation

Security shutters are low maintenance, manually operated by counterbalance springs or if required electrically operated by key switch with options including group controllers for multiple installations, remote or coded access controls.

Installation

Avon provides a complete installation service with our own CSCS qualified door engineers, equipped with all necessary equipment to carry out the work required. Also a full after sales contract maintenance service ensuring that any door is kept in the best working condition.
